

**Position: Manufacturing Supervisor**

**Location: Asheville, NC**

The Manufacturing Supervisor oversees the shipping, receiving, and inventory departments. This person needs to have experience with various shipping and receiving procedures as well as keeping up with warehouse inventory. The Manufacturing Supervisor will manage anywhere from 50 up to 75 employees, including 3 team leads.

Some Main Highlights include:

- Oversee day to day operations throughout the plant
- Maintain vendor relationships while keeping inventory and materials levels stocked
- Management of shipping and logistics teams
- Employee training and discipline responsibilities including scheduling and attendance issues
- Practicing lean manufacturing throughout the facility and making suggestions and operations where areas can be improved
- Implementing KPI's and continuous improvement methods for shipping to run as effectively as possible
- Leading weekly, monthly, and quarterly meetings with direct reports as well as upper management for any updates which need to be brought to their attention
- Familiar with implementing SOP's and adjusting current practices if needed
- Experience working with ERP systems (SAP or Oracle are a plus)
- Must have worked in a Manufacturing or Distribution environment
